

### ***Looking for a new way to inspire your players?***

The Lazer™ 900 delivers high-intensity workouts from the top NBA skills coaches and trainers directly to users around the world. Through *LIVE and on-demand drills*, it's the industry's most engaging tool on the market for improving ball-handling and real skill enhancement for the court. With three adjustable levels of stability, this motion-based cardio trainer is designed to mimic the movements of pro basketball without the rim. Our exceptional training aid tracks every move of your body and every bounce of the ball as you aspire to dribble to the tempo of the audio track in progress. While easy to set up, our unprecedented technology enables us to recreate multiple playing situations so players can train exactly the way they need to---on their own time, on their own terms, perfecting their handles interactively! Includes a 1 year warranty and a drill video for training purposes. For more information visit us at: [www.handlefitness.com](http://www.handlefitness.com)
